*"I started my company to give entrepreneurs a better option for websites: faster, cheaper, better than everyone else."*

After building websites that cost \$50-180k at a traditional web design agency, **I knew that small businesses and entrepreneurs deserved a better option** to be found online. Something **PROVEN** to work, but cheaper, faster, and better than Wix, Squarespace or GoDaddy - so I started Launch Kits: Home of the PERFECT website.
